Design Trend: Farmhouse Natural

The Farmhouse trend has evolved. It is less traditional with a beautiful mix of modern clean lines paired with warm whites to neutrals, and the warmth of natural toned wood. With this warming trend, there are more opportunities for browns and terra cotta tones, while black still offers a great punctuation to the space. The light neutral walls and large windows ensure that the space is not dark, but airy and comfortable.

Design Trend: Cozy Cottage

The draw of simpler times and slower living is pulling us to rural settings, even if only within our city walls. Utilizing family heirloom pieces and décor that has a lived-in aesthetic, the Cozy Cottage trend has us living casually, where nothing is too precious, and everyone is invited to kick back and relax.
